

Why MAPS[®]?

The interactive active-learning nature of the MAPS simulations[®], the feedback provided, and their challenging hands-on engaging nature combine to make MAPS[®] a powerful learning tool. They're fun too, for students and for instructors!

MAPS simulations[®] are time-efficient, requiring about 1-2 hours start-to-finish working time.

The sophisticated and challenging nature of the MAPS simulations[®] leads to high-quality student-learning experiences. Since these simulations may be used with minimal instructor input, instructor productivity is enhanced, especially in very large-sized classes.
